

Planting facade gardens

Removing a strip of pavement along the facade of a building allows the rainwater from the facade to infiltrate into the ground. Climbing plants friendly to birds and butterflies increase urban biodiversity. Plants

Urban green-blue grids

in the ground need to be watered less than potted plants.

Climbing plants growing in a facade garden allow the covered part of the facade to remain cool in summer. If fruit-bearing plants, such as grapevines or redcurrants, are used, the fruit offers food for yourself and, for example, birds.
